**LETTER OF DEFICIENCY
WET 2004-19**

May 20, 2004

Mr. James Nardone
23 Myopia Rd.
Stoneham, MA 02180

RE: DES Wetlands File #2004-00994 Willow Lane, Deerfield

Dear Mr. Nardone;

On May 19, 2004, personnel from the Department of Environmental Services ("DES") conducted an inspection of the above referenced property, more specifically referenced on Town of Deerfield Tax Map 207 as Lot 74 (the "Property"). The purpose of the inspection was to determine compliance with RSA 482-A and NH Code of Admin. Rules Wt 100-800.

During the inspection the following deficiencies were documented

1. A channel measuring approximately 100' x 4' had been dredged in wetlands on the Property without a permit from DES.
2. Approximately 1,823 square feet of wetlands had been dredged and filled on the Property with a permit from DES.

In response, you are requested to take the following actions

1. Immediately install either a straw or gravel filled burlap bag check dam or silt fence across the dredged channel ten feet back from the shoreline. Hay should not be used in place of straw. Literature about check dams and silt fence is enclosed for your information.

2. By June 21, 2004, retain a certified wetland scientist to prepare a restoration plan for the Property. The restoration plan should be submitted to DES for approval by July 21, 2004 and contain the following:

- a. A plan with dimensions, drawn to scale, indicating the footprint of the wetland prior to disturbance (delineated in accordance with Section F of the *Corps of Engineers Wetlands Delineation Manual*), the footprint of the existing conditions indicating the areas that have been dredged, and dredged and filled;
- b. A plan for re-establishing the wetland to its original footprint;
- c. A proposed means of erosion control;
- d. A proposed schedule and restoration sequence listing equipment and methods for accomplishing restoration;
- e. A proposed planting plan for the re-establishment of wetland vegetation;
- f. A monitoring and reporting schedule including an initial report to DES and at least one restoration progress assessment report after a full growing season.

3. Carry out restoration as conditioned in a separate DES Restoration Approval Letter.

RSA 482-A, the New Hampshire Wetlands law, was enacted to protect and preserve wetlands and surface waters from unregulated despoliation. Prior to dredging, filling, or construction in and adjacent to wetlands or surface waters, an individual is required to obtain a permit. If work is done without a permit, this is considered a violation of RSA 482-A. Failure to respond to this Letter of Deficiency in a timely and complete manner may be construed as noncompliance by the receiving party.

DES personnel may conduct another inspection at a later date to determine whether you have come into and are maintaining full compliance with the applicable statute and rules.

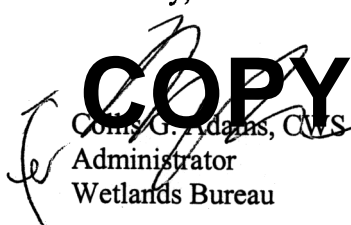

Issuance of this letter shall not preclude further enforcement by DES. Failure to comply with RSA 482-A will result in enforcement by DES, including but not limited to the issuance of fines, administrative orders, or referral to the New Hampshire Office of the Attorney General for prosecution of civil or criminal penalties. If an order is issued to you, it may also be recorded with the Registry of Deeds as an encumbrance against your property.

All documents submitted in response to this Letter of Deficiency should be addressed as follows:

Arlene Allen, Compliance Specialist
Wetlands Bureau
Department of Environmental Services
29 Hazen Drive
PO Box 95
